

I am writing to voice my opinion for letting XM Radio to broadcast weather and traffic programing. I believe that if I am paying a company for services or programing, that if they would like, to let them expand their programing to expand their buisness and allow me to enjoy extra features and benifits that I pay for. The whole point of this is that, I don't give my money to normal broadcast stations, I pay XM over \$200.00 a year for service and if they would like to give me more for MY MONEY then why shouldn't they be allowed to.
